EDUCATION	Ph.D. in Economics , University of Houston <i>Dissertation Committee: Willa Friedman (Chair), Aimee Chin, Chinhui Juhn</i>	(Expected) May 2020
	M.A. in Economics , University of Houston	August 2019
	Master of Financial Economics , University of Colombo, Sri Lanka	January 2014
	B.S. in Engineering (Electrical) , University of Moratuwa, Sri Lanka	June 2009

FIELDS OF INTEREST Development Economics, Labor Economics, Health Economics, Applied Microeconomics

WORKING PAPERS **Women's Labor Market Opportunities and Fertility Decisions: Evidence from Sri Lanka [Job Market Paper].**

Abstract: Concerns about left-behind children and dangerous working conditions abroad have encouraged some governments to restrict women's labor migration. I examine how women's fertility responds to such restrictions in Sri Lanka. The Sri Lankan government introduced a policy in 2013 prohibiting women from migrating for work based on their age and the age of their youngest child. These restrictions could alter fertility decisions when women simultaneously choose both future employment and childbearing. Using a panel dataset created from the Demographic and Health Survey in a regression discontinuity in time framework, I find that women from poor households, who are most likely to migrate, change their fertility behavior. Young women, who are already restricted from migrating based on their own age increase their fertility. Older women, who are restricted from migrating only if they have young children, reduce their fertility. As a result, new mothers are less-educated and younger, which may have an impact on child outcomes. My findings contribute to the literature on migration policies in developing countries and trade-offs between women's employment and fertility decisions.

Trends in Wage Inequality in Sri Lanka [Working Paper].

Abstract: Stylized facts suggest that wage inequality in Sri Lanka has increased over the 1996-2006 period followed by a significant decrease over the 2006 to 2014 period. Using Labor Force Survey data and a supply and demand framework, I find that an increase in the relative supply of high skilled workers alone does not explain the differential trends in wage inequality. Significant shifts in factor demand in favor of high skilled workers contributed to the increase in wage inequality in the earlier period. Although the shift in demand still favors high skill workers in the later period, the increase in relative supply has the dominant effect contributing to the decrease in wage inequality. Moreover, I find evidence of occupational downgrading towards low skilled workers in the later period.

WORK IN PROGRESS "The Effects of productivity Shock to Men's Labor Supply on Household Resource Allocation"

TEACHING EXPERIENCE	Instructor Department of Economics, University of Houston Intermediate Macroeconomics Principles of Macroeconomics	Spring & Summer 2019 Fall 2017, Summer & Fall 2018
	Teaching Assistant Department of Economics, University of Houston Behavioral Economics Microeconomics Theory II - PhD Level Introduction to Economic Data Analysis Intermediate Microeconomics	Fall 2019 Spring 2017 Spring & Fall 2016 Fall 2015, Spring 2018
WORK EXPERIENCE	Assistant Director Central Bank of Sri Lanka, Colombo, Sri Lanka	September 2010 - July 2015
	Electrical Engineer Ceylon Electricity Board, Colombo, Sri Lanka Bharti Airtel Lanka Ltd., Colombo, Sri Lanka	February 2010 - September 2010 August 2009 - February 2010
